

Estimator V5

The right tool for fast, accurate, and competitive quotes

Cordell Information's Estimator V5 offers all the functions you need to deliver prompt, accurate quotes based on the latest costing information.

As we all know, the building trade is competitive. Your quotes need to take into account current building costs while still delivering a healthy bottom line.

Cordell Information has been providing estimating solutions to builders and contractors for over 40 years. Estimator V5, our new upgraded online estimator, is easy to use and offers fast, convenient access to the latest prices on materials.

Estimator V5 contains many useful features, such as ready-made templates for a wide range of residential building structures. It's practical functions mean you can rapidly create an estimate without having to build it from scratch.

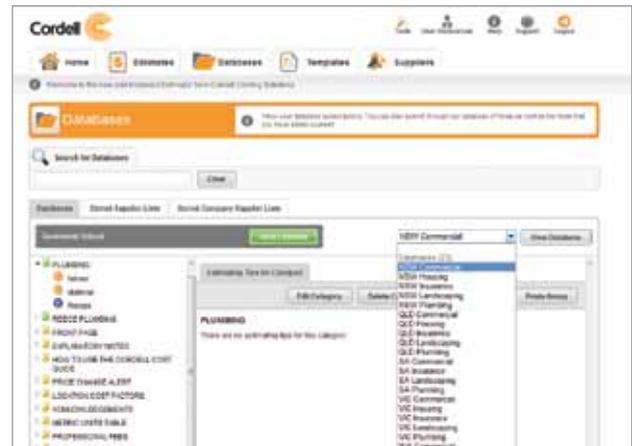

The Cordell Estimator V5 home page offers user-friendly functionality allowing you to navigate through the program quickly and efficiently.

Avoid losing money. Give your quotes up-to-date accuracy

Estimator V5 gives you control over the labour, material and plant hire component in each category, resulting in more accurate pricing.

- Create your own automatic price prompts.
If Cordell prices in an existing estimate are not current as at the day you are finalising your estimate, you can avoid losing money due to incorrect pricing.
- Create your own Suppliers directory.
Estimator V5 lets you send instant requests for pricing, and makes a record of the source of your pricing.
- Create your own database and unit rate to store prices in one convenient spot.
- Select data from multiple databases - such as Cordell's database, your suppliers, or your own.
- Restore previously deleted estimates, templates and suppliers (unlimited time frame) just in case you want to retrieve previous data.

Estimator V5 gives you full access to a selection of costing databases to suit your individual needs. Simply obtain the information from the database, select the items and send them to your estimate.

Less time at a desk, more time on the job

Estimator V5 speeds up your estimates, cutting time spent on paperwork and giving you more time to get on with the job.

- Use tailored templates or merge templates together to speed up your estimating.
- Import a personalised supplier database to have your own supplier's prices instantly at hand.
- Display the current estimate and database items side by side for a single page view.
- Estimator V5's PlanSwift integration ensures automatic, fast and accurate transfer of take-off quantities straight into your estimate, saving you valuable time.

Project management tools to help you

Estimator V5 now includes two new features:

- **Cordell Project Scheduler:** tracks the progress of your job throughout all stages of your construction project
- **Job Cost Analysis Report:** designed for builders, this handy tool allows you to track and monitor the costs for each of your jobs, helping you avoid nasty cost overruns.

Unlimited support

Estimator V5 is very user-friendly. But if you do need help, Cordell's specialised technical and estimating team offer unlimited support at no extra cost.

To discover how **Cordell Estimator V5** can help you get out from behind your desk and on site sooner, contact **Cordell's Costing Team** on **1800 80 60 60** or visit **www.cordellestimating.com.au**.
